TENKARA FISHING CATALOGUE

NISSIN

DESIGNED & PRODUCED by NISSIN

For the people enjoying a fishing life.
 For the anglers dreaming unique Tenkara products.
 For the lovers choosing high-quality gears made in Japan by NISSIN.

What is Tenkara?

Tenkara, literally meaning "from the sky" (ten - ka - ra), is a very ancient fly fishing technique. Originated in Japan, the first rods were long bamboo poles with attached a horse hair or silk fly line and a single fly ("Kebari").

After over 50 years of experience in manufacturing telescopic Tenkara rods (including Seryu and Honryu), Nissin now presents an extensive line of products, all Made in Japan and ready to meet the needs of Tenkara anglers across the world.

Rods Series and Accessories, specifically engineered to please all anglers and for catching many different fish species in a wide variety of freshwater habitats around the globe.

For both beginners and advanced anglers, NISSIN introduces seven different series of Tenkara fishing rods and wide range of accessories, thus representing in a very simple way the origins and evolution of this ancient technique originated in Japan.

All articles listed in the catalogue result from a combination of high quality materials and the expertise of skilled technicians and angling Masters ("Sensei").

Made in Japan, Nissin presents a line of products that blend technology with tradition and passion for fly fishing, featuring a perfect harmony of simplicity and quality.

Going back to basics, a technique accessible to anyone, a simple way to fish and appreciate the original essence of fly fishing, Tenkara only by NISSIN!

NISSIN, the creator of a new fishing experience

The renowned Japanese Company NISSIN, specializing in the production of saltwater and freshwater fishing products, now presents the new 2015 catalogue entirely dedicated to the TENKARA technique.

NISSIN

DESIGNED & PRODUCED by NISSIN

ZEROSUM TENKARA

Ask any Tenkara angler what characteristics of their rod they would like to improve and most likely the answer is : “ lightness and accuracy ” . If this is your case, the Zerosum series is the right choice for you ! These premium Tenkara rods are designed for experienced anglers or passionate anglers who want to improve their skills. High module carbon fibers combined with advanced manufacturing technology make this series very light, balanced and progressive, allowing smooth and precise casts. Plus, the longer version is ideal for fishing wide open waters and catching good-sized fish. The 6:4 action is a must if used with a Level Line.

ROYAL STAGE TENKARA

Last-born of Nissin, the 27.5 cm cork handle allows the Tenkara angler to hold the rod firmly in different ways while casting the line or catching a fish. These rods are finished in an attractive metallic green, black and gold "Royale" design. Made of new generation carbon fiber, they are extremely light and well balanced. Available in two different actions, 6:4 and 7:3, these rods have a very smooth action and are the perfect choice for beginners, or demanding anglers looking for a high quality Tenkara rod at an attractive price. ROYAL STAGE TENKARA, a perfect combination of performance, price and quality. Tested with TL and LL, this series is suitable for any tenkara caster who wants to achieve great fishing results.

Coming Soon

ZEROSUM ONI TENKARA HONRYU

I am not exaggerating when I say that I have spent all my life in search of new streams for good Tenkara fishing spots. I remember when I was fishing the famous Nagano river trying to catch Amago fish. With all their strength these fish were standing in the middle of the strong current of the wide river, right on the opposite bank, searching for food. After this experience, I have always been looking for the perfect fishing rod, light enough and with the right action in order to cast effortlessly and accurately on same spot over and over again.

The "ZEROSUM ONI TENKARA HONRYU 450" is definitely the perfect rod for big rivers (Honryuu). This new rod is very different from the previous model: its ultra-lightness and great casting performance with tapered line (TL) or level line (LL) make this easy-to-use Tenkara rod ideal for everybody. When I came across the NISSIN Company, I asked them to make this rod following a concept of traditional Japanese handcrafting! Naturally, this important company also needs to adopt mass production rules in order to cut costs, but they still have a strong feeling for handmade processes and successfully manage to respond to the requirements of the market. All parts are made in Japan, proudly delivering the Japanese quality to the world.

SEIKON BECCHOU FUJI-RYU TENKARA

Smaller but bigger ! There are only two models in this series,representing a unique combination of technology and tradition.Thanks to a special manufacturing and finishing process of the carbon fibers, the Seikon Becchou looks like a traditional bamboo rod, but has a 7:3 “ mid-tip ” modern action. Fast, light, but with a backbone for landing big fish, this premium rod is tailored for both experienced and medium level anglers. It also features a short 18cm cypress grip, for those passionate anglers who like the feeling of wood in classic old style. This series offers enhanced performance when it comes to fast casts and narrow loops in windy conditions or placing the fly on a very small target. Ideal if used with heavy TL or long LL when using dry, wet or heavy sinking flies.

SEIKON BECCHOU FUJI-RYU TENKARA

AIR STAGE FUJI-RYU TENKARA

The powerful series “ Air Stage Fuji-Ryu ” offers a variety of rods in different lengths enabling the Tenkara Angler to catch good-sized fish in all waters. Available in two different actions, 5:5 and 6:4, these rods feature a traditional wooden grip and attractive Japanese colour finishings. This particular action 6:4 delivers more power than other standard “ mid-flex ” action rods. The Air Stage Fuji-Ryu series allows to cast any line (TL and LL, including light furred horse fly lines) with energy and perfect accuracy. Thanks to their action and structure, the Air Stage Fuji-Ryu rods allows prompt strikes,especially at great distances, and help landing fish quickly. A wide section features a strong backbone for catching and landing bigger fish.

AIR STAGE FUJI-RYU TENKARA HONRYU

The Air Stage Fuji-Ryu Honryu series is the new “ frontier ” of modern Tenkara. Two sizes, 3.80m and 4.50m, a 30cm long cork grip, a 6:4 “ full-flex ” smooth action, these rods are the perfect choice for fishing wide open waters, especially when it comes to casting a very long LL and fishing on the surface. Well balanced tenkara rods, super light, but strong enough to fight and land nice fish. Although they aren’t perfect “ travel ” rods, since both models collapse at over cm. 100, their features, combined with their performance on big waters, make these rods unique on the market. Furthermore, the 4.50m version leads the way to a “ new frontier ”in the transition from single handed to double handed tenkara casting.

AIR STAGE FUJI-RYU TENKARA

PROFESSIONAL KAWASHI TENKARA

The price might seem that of an entry level, but the quality of the carbon fiber and the beauty of these rods are of a premium quality product. Engineered for the demanding angler who seeks high performance gear or simply wants to purchase a second or third tenkara rod at an affordable price, the Professional Kawashi series is the right choice. Available in two different actions (6:4 - 7:3) and three different lengths (3.20m - 3.60m - 3.90m) to cover all possible needs in all waters. Cork/EVA handle and standard length 22.5cm, these rods are ultra light and extremely balanced thanks to a special manufacturing process of the carbon fiber, resulting in very sensitive and easy casting of LL and TL and perfect for fishing with dry, wet, or soft hackle flies, both upstream and downstream.

PRO SPEC 2WAY TENKARA

This is the only telescopic “ adaptable ” rod manufactured by NISSIN. Two models, with two different lengths and two different actions, are the right solution for modern backpackers who love hiking in the wilderness. These versatile rods may be a transitional choice for beginners or advanced tenkara anglers. Pro Spec 2Way is the ideal rod for fishing small brushy headwaters and narrow mountain creeks, and also more wide open streams, when it becomes necessary to adapt the length of the rod and casting range. The 3.60m - 7:3 allows great line control and accuracy at both its lengths (3.20m - 3.60m), and makes it possible to cast an extra long LL with extreme precision and gently place your fly on the water. The 6:4 version is a very smooth “full-flex” action perfect with any LL or super soft TL.

PROSQUARE SUPER TENKARA

This is a Super series at a super price ! The quality of these entry level rods, entirely Made in Japan, is unrivaled if compared with other models on the market. Accurately finished in metallic blue and black, they come in three different actions, 6:4, 7:3 and the Super 8:2. The 6:4 and 7:3 rods are very sensitive, great for beginners, especially if used with TL Fuji-Ryu Tenkara Bass or LL Fuji-Ryu Tenkara PII Line fishing for trout, grayling, chub, bass, and other smaller species that can be caught with this technique.Undoubtedly, the 8:2 is the “ Super Action ” rod of this series. It allows to cast effortlessly a heavy TL, also in windy conditions.Modern Tenkara anglers chose this action combined with long rods on wide open waters, like big rivers and lakes, to catch and land nice sized fish quickly. In particular, the 3.90m or 4.50m rods feature a reinforced structure, resulting very effective if used double handed, especially when fishing with dry flies and casting at long distances.

Standard Sakasa Kebari fly, good for dry and wet fly fishing. Great to try in early summer or late trout season.

Traditional Kebari fly, with reverse hackle tied on pheasant feathers. Great for imitating nymphs swimming or emerging on the surface. Best if used from spring to late autumn.

Kebari, another reverse hackle tied in a limited edition. Wings made of teal duck flank feathers, very attractive fly in both fast and slow waters.

This is a Kebari fly for the "big ones". Dressing totally derived from the experience of Hiromichi Fuji "Sensei". A sort of "Stimulator" dry fly Made in Japan.

Another Kebari fly for the big fellows, also designed by Hiromichi Fuji "Sensei". This artificial is tied reverse hackle and used as wet fly. Good All year round.

A Kebari fly for selective fish. Tied on a small size hook #17, perfect if fished in clear waters. The red body stimulates the fish reaction. Any season, any water.

- 12 -[cd] 1503277 Dry

Another Kebari fly for difficult fish. Small size #17, brown body to "match the hatches" of a wide number of insects of the mayfly family, suitable for many waters and fishing conditions.

Standard Kebari, good for dry and wet fly fishing. Red body version, good during mayfly hatches.

Standard Kebari, good for dry and wet fly fishing. Black body version, good for imitations of midges and bugs. Good all year round.

Good Assortment H-1: Set of Fuji's standard Kebari. Comes in three different body colours, brown, red and black, to cover most fishing situations.

Assortment C-1: Set of Fuji's standard Kebari. Comes in three different body colours, brown, red and black, to cover most fishing situations.

The best choice of Kebari for "Iwana"or Japanese char. Developed by Hiromichi Fuji "Sensei", this is a perfect dry fly in slow or running waters.

- 13 -[cd] 1503278 Wet

- 15 -[cd] 1503380
- 16 -[cd] 1503381
- 17 -[cd] 1503417
- 18 -[cd] 1503418

Another reverse hackle Kebari for "Iwana", the Japanese char. Created by Hiromichi Fuji "Sensei", a perfect wet fly in clear running waters

Pure tradition in this Kebari fly, tied reverse hackle on a silk looped eyeless hook. Good for delicate hook sets when the fish are very selective and will only take flies gently.

These Kebari flies are tied using a combination of natural and synthetic materials.Perfect if used downstream "skating" across the surface or left adrift in a current imitating a real caddis or other insects attempting to cross the water. A selection of three colours covers all situations.

Synthetic fibers are not common in Japanese dressings, but this wet reverse hackle Kebari fly is deadly attractive to fish, especially in the summer season if used in moving water. Comes in three assorted colors to cover all needs.

Fuji-Ryu Tenkara Shikake - Maki II (two-spool-pack)

Practicality and design, the line holder spools by PALS are undoubtedly the most advanced on the market! Spool diameter 6.5 cm, black plastic frame with EVA insert to secure your lines and flies correctly and quickly. The EVA core allows to wind in perfect coils any furred, braided or monofilament line avoiding time-consuming tangles!Coming in a two-spool-pack, Fuji-Ryu Tenkara Shikake line holders are exclusively designed by Nissin.

FUJI-RYU Tenkara Furred Line (TL, LL)

NISSIN and PALS offer a large selection of Tenkara lines suitable for all anglers and fishing conditions. All lines feature extreme casting control and deliver accurate fly presentations, also at great distances.Fuji-Ryu lines are the right choice for both beginners and advanced anglers fishing big or small waters and represent the last important piece you need to buy to start Tenkara fishing .

Fuji-Ryu Tenkara Perfect Line (black pack)

Made of 7 strands of line, this furred line is 100% fluorocarbon. Designed for advanced tenkara anglers or those who want to improve their skills, this ultra thin TL is a high tech line.Perfect Line delivers high precision casts and works at best on selective fish when your flies need to be accurately presented to target.

Fuji-Ryu Tenkara Perfect Line Soft (black pack)

Similar to the Fuji-Ryu Perfect Line, the Fuji-Ryu Perfect Line Soft offers more benefits to anglers who love full-flex or mid-flex rod actions (5:5 - 6:4) and gentle presentations.Features a softer fluorocarbon that allows better line control and more sensitivity for perfect casting in all conditions. Suggested for intermediate to advanced anglers.

Fuji-Ryu Tenkara P II Line (red pack)

One of the top selling furred Level Lines. Made of 3 coloured strands of fluorocarbon, it helps the angler-follow the line in poor light conditions and is ideal for fishing upstream or downstream with Sakasa Kebari flies. With the use of the P II Line "modern" tenkara anglers will improve their ability to cast LL and master their strikes when fishing with wet flies or light nymphs.

Fuji-Ryu Tenkara Bass SP Pro (blue pack)

100% monofilament nylon, 7 different strands. NISSIN, always striving to improve line performance, now presents this unique taper made of a very thin line for powerful casts and accurate fly presentations. Perfect line in rough weather conditions. Suitable for any rod action, all beginners or advanced anglers should have this premium line on hand.

Fuji-Ryu Tenkara Bass (yellow pack)

NISSIN's concept of an "entry level" tapered line, 7 nylon strands.Top selling line, ideal for beginners, backpackers or less experienced tenkara anglers.Great line in any water, easy to cast and suitable for different rod actions and lengths.

Fuji-Ryu Tenkara Bass Soft (green pack)

Another 7 strand monofilament nylon. Tapered Line, made from softer material for lighter rods and gentle fly presentations. Great for beginners fishing with dry or wet flies.

NISSIN TENKARA LILIAN

A braided line to connect the Tenkara Line to a rod tip. NISSIN / PALS offer on this pack 1mt red color Lilian on three different size diameters to cover all extra Lilian needs to repair or replace the old ones.

TESTER PROFILE

富士弘道
Hiromichi Fuji "Sensei"

This Tenkara Master ("Sensei") is a living legend in Japan. First promoter of tenkara as a recreational sport and author of many articles and books dedicated to tenkara fly fishing. A very meticulous angler, an incredible Master of casting and fly presentation and a great expert of water reading, Hiromichi Fuji "Sensei" has developed his own tenkara technique and named it "sutebari". Thanks to his long experience, he collaborates with NISSIN and PALS at the development of modern tenkara rods and furred tapered fly lines, and advises on the selection of the most beautiful Kebari flies for the NISSIN catalogue.

柳原正巳
Masami Sakakibara "Shishou"

He was born in Suuchi-Gun, Shizuoka, in 1951. Shizuoka is almost in the center of Japan. Mr. Masami Sakakibara grew up surrounded by mountain streams, in a mountainous area west of Mori-Machi, also known as small Kyoto. At the age of 4, he was taught fishing by his father and he enjoyed river fishing only, until he became 18. Then he started practicing sea fishing, bait fishing, Tenkara fishing, fly and lure fishing, but it was only at the age of 25 that he really became a disciple of Tenkara in mountain streams. For many important magazines he wrote several articles like "Introduction to Tenkara fishing (Tenkara Tsuru Nyuumon)" and "Tenkara fishing trip (Tenkara No tabi Choukouki)". In addition, his famous video "Strongest Level Line" has caught many fans and he also appeared on popular TV channels together with famous stars like the Japanese actor Mr. Kantaro Nakamura and the musician Mr. Shozo Ise. He also took part at the Italian TV program "Pescavventura" on Pesca TV/Sky236, where he introduced his technique like a Japanese missionary spreading this practice with greatest energy.
